## Description

2025 Aviat Husky A-1C-200HP – Backcountry-Ready, Panel-Upgraded

This 2025 Aviat Husky A-1C-200HP (Lycoming IO-360-A1D6, 200 hp) is a beautifully equipped, backcountry-focused example that blends serious off-airport capability with a modern, IFR-capable cockpit. Finished in Aviat's Birkmeyer paint scheme (Fire Engine Red with Metallic Silver accents) and riding on 31" Alaskan Bushwheels with lightweight Alaska Gear Co. struts and an ACME Aero Stinger tailwheel, it's purpose-built for operations off grass, gravel bars, farm strips, and remote backcountry sites.

Up front, the Hartzell Pathfinder three-blade propeller delivers outstanding thrust and short-field performance, while Garmin's integrated avionics suite makes this Husky equally at home in the system as it is on a river bar. A G500 TXi touchscreen PFD/MFD with engine indication anchors the panel, complemented by a GTN 750 GPS/Nav/Com, GMA35C Bluetooth audio panel, GTX 345R ADS-B transponder, Garmin G5 standby indicator, and a Garmin GFC three-axis autopilot for stable, precise control on longer cross-country legs.

Inside, Oregon Aero ergonomic 16G seating, Bose headset jacks, and thoughtful storage (removable rear seat, side baggage, and aft stowage) create a comfortable, practical cabin for utility flying, weekend trips, or extended adventure travel. LED landing, taxi, Wig Wag, and NAV/Strobe lighting add visibility and safety in low-light environments, rounding out a very complete, turnkey Husky package.
